

## 08/28/15 - Bates Boots Delta 8" Side Zip - A breakthrough side zip boot

### Bates Boots Delta 8 ? The Introduction

Bates are a very popular brand in the U.S and make loads of boots for the Military and police. In this I am going to talk about the Bates Boots Delta 8. The Bates Delta 8 were made mainly for comfort and speed for police officers. The Bates ICS system has been put in the boot to adjust the comfort to your needs as Bates understands that everyone is different.

### **Bates Boots Delta 8 ? The Look**

The Bates Boots Delta boot has a very unique look to it. I would say it has a very modern look to the boot. The side of the boots has random splashes of leather over the nylon panels. The sole treads sticks out of the side of the boot and can be seen. The sole also comes up the front of the boot like your running trainers do. This offers protection from scuffing the leather off the toe. The eyelets on the boots are a very strong plastic which makes the boot have a futuristic finish. I personally like the look of the Bates Boots Delta 8 side zip boot. I understand that the look of these boots is similar to Marmite. You will either love them or hate them.

## **Bates Boots Delta 8 ? What is in the boot?**

Bates have done a fantastic job on this boot. The boot is made from durable full grain leather which is designed so the boot is easy to clean also it makes the boot more durable. The nylon mesh lining in and around the boot has been designed to be very breathable. This is in place so your feet will stay at the perfect temperature through out your shift. We all know you get unhappy when we are uncomfortable on shift. The side zip on this boot is one of the best you can get on the market. It has been designed so the user can get the boot on and off really quickly. I being not a massive fan of side zip boots was actually very impressed with with how they work. The sole is quite thin and looks like the tread will last very long even for an office on his feet all day. The sole is also slip resistant so you have no worries about falling over even in the wet. The Bates Boots Delta 8 is one of lightest boots on the market which makes it designed for the every day bobby on his feet or in the car. The Bates boots Delta 8 comes with the ICS system which allows you to adjusted the feeling of the sole. It is a great addition to top off a great boot.

## **Bates Boots Delta 8 ? Where can I get a pair?**

Bates are a brand from the U.S and it can be hard at times to get that sort of gear here in the U.K. There are a few places that do stock them. I always have gone to Patrolstore to get mine as they have always helped me. I would advise any one who is looking for a lightweight side zip boot to go for the Bates Boots Delta 8 side zip boots.
